

Greener supply chains from a CMO powered by Pfizer

At Pfizer CentreOne, we're actively building sustainable supply chains to minimize our environmental impact during drug manufacturing, in alignment with Pfizer's broader sustainability commitments.

We focus on minimizing our environmental impact throughout the manufacturing process, from sourcing to distribution, helping you achieve your sustainability objectives while helping to ensure patients receive the therapies they need

Our sustainability goals

We're committed to contributing to all 17 of the United Nations (U.N.) Sustainable Development Goals, which serve as a blueprint to achieve a better and more sustainable future for all.

Focusing on addressing global challenges such as inequality, climate change and peace, we continue to find ways to minimize our impact throughout pharmaceutical manufacturing.

We are also proud to share Pfizer's commitment to the Net-Zero Standard by 2040, which includes:

95% reduction
in our greenhouse
gas emissions

90% reduction
in value chain greenhouse
gas emissions

100% renewable
electricity
by 2030.

* All metrics are set against a 2019 baseline

Achieving our goals with supply chain sustainability

We're dedicated to building a more sustainable future through responsible supply chain practices. Working together with our colleagues, partners and customers we continually strive to make positive change and contribute to a healthier future for patients. Our efforts center on:

Supplier engagement and emissions reduction

We believe that reducing emissions requires a collaborative approach. We work closely with our suppliers to identify opportunities for improvement and implement effective solutions across our supply chain.

Sustainable packaging

Through innovative materials, designs, and systems, we minimize the environmental footprint of our packaging while benefiting patients and reducing costs.

Operational efficiency and green practices

Leveraging our Greener Workplace platform, we strive to maximize operational efficiency and improve environmental performance while minimizing our carbon footprint through renewable energy, green chemistry and biotechnology programs.

Driving positive change

We're on a continuous journey to build more sustainable supply chains as we progress toward our **Net-Zero Standard by 2040**:

- The largest U.S. site in Pfizer's network has cut greenhouse gas emissions by **24,000 metric tons** and reduced hazardous waste disposal by **10 million kilograms** annually.
- Pfizer's largest European site generates over half its electricity from renewables, with wind turbines cutting CO₂ emissions by **13,000 tons** each year.

Our Carbon Disclosure Project "A" rating further underscores our commitment to achieving Pfizer's broader sustainability goals through collaborative supply chain engagement.

Find out how we can help you conquer the challenges of today, seize the opportunities of tomorrow and build a lasting and sustainable legacy of innovation and advancement.
