

A leading global CDMO, powered by Pfizer

Why choose Pfizer CentreOne as your CDMO partner?

As an award-winning global CDMO, Pfizer CentreOne leverages Pfizer's extensive scientific and technical expertise to manufacture life-changing medicines for pharmaceutical and biotech companies like yours.

We offer cutting-edge development and commercial manufacturing solutions from small to large scale for oral solids, sterile injectables, small molecules and biologics, as well as regulatory support and tech transfer, to help your medicine reach the patients waiting.

We're able to scale with you every step of the journey by offering an expert suite of development and optimization services including:

Formulation

Manufacturing

Analytical testing

Validation

Method development

Oral solids

Sterile injectables

Small molecule API

Biologics

Drug Products

Drug Substance

Collaborative Partnership

We work with you to get your medicine to patients fast because to us, **time is life**. We offer tailored solutions to meet individual need as we know each project is different.

Global Reach

Our 35+ sites have the technical and scientific expertise to offer the flexibility and scalability you need for your manufacturing and development journey.

Quality and Compliance

Our facilities and processes are designed to meet and exceed global regulatory standards, including cGMP, FDA, and EMA. We service over 100 markets!

IP Protection

We have robust systems in place that provide comprehensive tracking and project notifications as well as a firewall for all partner documentation.

With global expertise in regulatory affairs spanning 150+ countries, our team offers a comprehensive, end-to-end service, guiding you through every stage of the regulatory process.
